<sup>1</sup> The Unlimited series has free future upgrade to 500+ channels.

<sup>2</sup> Support of QZSS is incorporated and will be provided through firmware upgrade.

<sup>3</sup> Measurement precision, accuracy and reliability are dependent upon various factors including number of satellites, geometry, obstructions, observation time, ephemeris accuracy, ionospheric conditions, multipath etc. Figures quoted assume normal to favourable conditions. Times required are dependent upon various factors including number of satellites, geometry, ionospheric conditions, multipath etc. A full BeiDou, Galileo and GPS L5 constellation will further increase measurement performance and accuracy.

<sup>4</sup> Might vary due to atmospheric conditions, signal multipath, obstructions, signal geometry and number of tracked signals.

<sup>5</sup> Might vary with temperatures, age of battery, transmit power of data link device.
